

Assessment Criteria: 2020 Maternity Services Research Request for Proposals (RFP)

Applications assessed and scored by external peer reviewers and Assessing Committee members will utilise the following criteria and anchor point descriptors. The best possible score for an application is 28.

A. Fit with the Request for Proposals (RFP)

- 7 = The applicants have convincingly demonstrated that the proposed research fully aligns with all of the objectives and requirements as stated in the RFP. The proposal clearly conveys a thorough understanding of the objectives and requirements and has outlined how the components of the RFP will be addressed.
- 4 = The applicants have attempted to align the proposed research with the objectives and requirements as stated in the RFP. The proposal does not address all of the objectives and requirements, or does not sufficiently address all of the objectives and requirements to provide the desired outcomes of the RFP. The proposal conveys an understanding of the requirements and has attempted to outline how the components of the RFP will be addressed.
- 1 = The applicants have not aligned the proposed research with the objectives and requirements to provide the desired outcomes of the RFP. The proposal conveys no understanding of the objectives and requirements of the RFP.

B. Scientific Merit

- 7 = The rationale for the proposed research is extremely well made. The aims and (where appropriate) hypotheses are excellent. The proposed research may represent a highly original and innovative approach to addressing the health question. Original findings are highly likely to result.
- 4 = The rationale for the study is well made. The aims and (where appropriate) hypotheses are acceptable. Original findings may result.
- 1 = The rationale, aims and hypotheses for the study are poor or absent. Original findings are unlikely to result.

C. Design and Methods

- 7 = The proposed study design is excellent. The methods and proposed analyses are very comprehensive and clearly appropriate. The applicants demonstrate full awareness of the relevant technical issues. The statistical power (where appropriate) is sufficient to ensure a definitive outcome and the statistical analyses are well-developed. It is difficult to suggest improvements.
- 4 = The study design is adequate. There may be either insufficient detail for parts of the method and proposed analyses, or the study would benefit significantly by improvements in one or more of these areas.
- 1 = The study design is unacceptable as proposed. Either the design is inappropriate, or there is no (or very little) detail on the methodology and proposed analyses.

D. Expertise of the Research Team

- 7 = The research team collectively have outstanding academic qualifications, as well as excellent topic based knowledge and experience to undertake the proposed research. They have an outstanding publication track record in major peer reviewed scientific journals as well as other professional publications, and/or substantial experience in disseminating research results.
- 4 = The research team collectively have the academic qualifications, topic based knowledge, and experience to undertake the proposed research. They have a track record of publication in peer reviewed scientific journals and other professional publications, and/or experience in disseminating research results. There are some areas, however, where this has not been fully demonstrated.
- 1 = The research team collectively have inadequate and/or inappropriate academic qualifications or research backgrounds to undertake the proposed research. They collectively have a weak publication record and there are serious doubts as to whether the research will be completed and disseminated appropriately.
