

June 2025

2026 Māori Health Research Career Development Awards Application Guidelines

These Guidelines apply to:

Career Development Awards

Māori Health Research Master's Scholarship

Māori Health Research PhD Scholarship

Māori Health Clinical Research Training Fellowship

Māori Health Research Postdoctoral Fellowships

Research Development Awards

Māori Health Research Summer Studentship

Māori Rangahau Hauora Training Grant

Māori Health Research Development Grant

Māori Health Research Knowledge Translation Grant

Part A: The Māori Health Research Career Development and Research Development Awards

This section outlines the **HRC Māori Health Research Career Development Awards and Research Development Awards, including:**

- an overview of the different award types, including the maximum value and duration
- the HRC priorities
- an overview of the application process, including key dates.

1. Māori Health Research Career Development Awards

The HRC Career Development Awards (CDA) provide research training opportunities for people who will contribute to improving health and economic outcomes for all New Zealanders. A range of awards is available to support emerging health researchers undertaking postgraduate research qualifications.

This section provides an overview of each Māori Health Research Career Development Award. For further information on each award type and its specific eligibility criteria, refer to Part D.

1.1 Master's Scholarship

The Master's Scholarship provides up to \$20,000 towards one year of personal support, plus tuition fees and a \$1,600 tikanga allowance, for students completing the research component of a Master's degree in any discipline whose proposed research programme will contribute to improving health and economic outcomes for Māori. Working expenses are not included in this award.

1.2 PhD Scholarship

The PhD Scholarship provides three years of personal support of up to \$30,000 per annum, plus tuition fees, up to \$10,000 in total research working expenses, and a \$5,000 tikanga allowance, for outstanding graduate students in any discipline whose proposed research programme will contribute to improving health and economic outcomes for Māori.

1.3 Clinical Research Training Fellowship

The Clinical Research Training Fellowship provides an opportunity for Māori medical, dental, psychology, nursing and allied health professionals who have a **current** clinical role to undertake a PhD or equivalent qualification in any discipline whose proposed research programme will contribute to improving health and economic outcomes for Māori. The Fellowship offers a stipend and covers university fees up to \$80,000 per annum, plus research costs of \$20,000 to the maximum value of \$260,000. A tikanga allowance of \$5,000 can also be claimed.

1.4 Postdoctoral Fellowships

The Postdoctoral Fellowships are available to applicants from all disciplines undertaking a research programme which will contribute to improving health and economic outcomes for Māori. The fellowships are to the value of \$100,000 for research-associated costs plus a salary, which is negotiated through the host institution, for up to four years. A \$3,000 conference allowance and \$5,000 tikanga allowance can also be claimed.

There are four named Māori Health Research Postdoctoral Fellowship award types, each focusing on a different area of Māori health research: Erihapeti Rehu-Murchie; Eru Pōmare;

Hōhua Tutengaehe; Irihapeti Ramsden. Applicants can apply for a General Māori Health Research Postdoctoral Fellowship if their research is in a different area from the four areas outlined; however, the proposed research must link to health and improving health and economic outcomes for Māori.

2. Māori Health Research Development Awards

This section provides an overview of each Māori Health Research Development Award. For further information on each award type and its specific eligibility criteria, refer to Part E.

2.1 Summer Studentship

The Summer Studentship provides \$7,500 to introduce research to students who have the potential to develop a career in Māori health research and contribute to improving health outcomes for Māori. Applications are sought from students undertaking health-related courses wishing to be involved in a research project focused on improving Māori health outcomes, over the summer vacation.

2.2 Rangahau Hauora Training Grant

The Rangahau Hauora Training Grant is intended to provide personal support to individuals wanting to undertake research training relevant to Māori health. This award is particularly suited to individuals who do not have an academic background but wish to learn research skills for an intended piece of health research that will be of benefit to their area, community or organisation. Up to \$12,000 is available.

2.3 Development Grant

The Development Grant provides up to \$10,000 to support Māori health researchers in developing a project proposal for the Annual Contestable Funding Round via one of four Research Investment Streams: Rangahau Hauora Māori health research, Pacific health research, New Zealand health delivery, and the General investment stream.

2.4 Knowledge Translation Grant

The Knowledge Translation Grant provides funding to disseminate health research knowledge and outcomes that key stakeholders (e.g. iwi, community, health providers, Ministry of Health, Te Puni Kōkiri) have identified as beneficial and important for future use, including policy and health service development. The HRC recognises the importance of dissemination and the various forms it can take depending on the target audience. A grant of up to \$5,000 is available.

3. HRC priorities

All HRC investment must have a clear line of sight to improving health outcomes for all New Zealanders, with a focus on areas of highest health need and communities with the highest health needs¹.

New Zealand's investment in health research must contribute to achieving the goals of the health system and the science, innovation and technology (SI&T) sector. It is important to consider and identify how your research will add value and contribute to these goals and wider system performance. The vision for the health system is timely access to quality

¹ Areas of highest health need and communities with the highest health needs are identified in the Government Policy Statement on Health 2024-2027

healthcare². A key focus for the science system is to harness the benefits of research and innovation to drive economic transformation.

4. Key dates

Event	Description	Date (1pm)
CDA applications open	Open date for creating registration and CDA applications on HRC Gateway	4 June 2025
Registration closes	Deadline for creating a registration	23 July 2025
Applications due	Deadline for submitting applications	23 July 2025
Outcomes released	Applicants will be notified through their research office and on HRC Gateway	9 October 2025

5. Application assessment process

Applications are assessed by a multidisciplinary Māori Health Research CDA Assessing Committee. Details on the assessment process are provided in Part D and Part E of these guidelines.

The assessing committee will primarily focus on the candidate and their potential development as a health researcher during the term of an award, as well as consider the potential contribution of the health research project to improving Māori health outcomes. However, HRC awards are highly competitive, and all criteria will be considered when assessing your application.

The HRC intends that, where appropriate, the assessment considers the productivity of an applicant relative to their opportunities. This can take into account both career disruption (for example, serious illness or parental leave), and specifics of an applicant's employment history (including clinical, teaching and administrative commitments, and time working in sectors such as industry or government that might restrict research outputs).

6. Host support

The HRC's contribution to research costs is intended to help establish your research objectives. There are no overhead costs associated with any career development award. The HRC expects that overhead costs relating to your research (contributions to property costs or laboratory space, utility charges, equipment charges, laboratory "bench fees", library charges, etc.) are covered by your host organisation. You should therefore confirm that your host organisation has adequate resources before applying for a career development award.

You may submit a proposal in another HRC funding round to cover the costs of completing your research project. However, HRC funding rounds are contestable, and funding is not guaranteed. Therefore, relying on other funding sources to complete your research may place your career development award in jeopardy.

If you move to another host organisation after the application's due date, you will need to inform the HRC of your proposed change as it could affect your application. The change request will be considered on a case-by-case basis.

² The Government Policy Statement on Health (2024-2027) outlines 5 priority areas; 5 non-communicable diseases; 5 modifiable behaviours; 5 health targets; and 5 mental health targets.

7. Notification and feedback to applicants

Your funding outcome will be updated on HRC Gateway. If your application was discussed at the committee meeting, you will also receive feedback as a written review summary.

The HRC reserves the right to not make an award in any particular category and to determine the number of awards allocated in a particular round.

Scholarships and fellowships must be taken up within four months of the date of the award. In exceptional cases, the HRC may consider applications for deferral beyond four months if an acceptable justification is provided at the time of the original application, e.g. for relocation purposes.

8. Contract Reporting

If you are successful, you will need to submit annual progress reports to the HRC within a month of your contract's anniversary. Reports should include your time commitments (i.e. HRC contract, other funders, teaching, clinical duties). You will also need to submit an end of contract report within three months of completing your contract. All reports must be submitted on HRC Gateway. Individuals named on your contract and your research office will have access to HRC Gateway and are responsible for submitting reports.

The HRC reserves the right to require special reports at any time during the term of your fellowship. Any awards that are extended beyond the original term will have additional reporting dates, as notified in the amended contract.

The HRC will review all reports and reserves the right to suspend or terminate your fellowship if your progress is unsatisfactory.

Suspension

The Council may, under the terms of the HRC research contract at its discretion for what is considered grave cause, suspend the tenure of an HRC Career Development Award or an HRC Research Development Award for such time as is thought fit or deprive a fellow of their fellowship. From that date, payments will cease or be suspended.

Intellectual property rights

The HRC has published guidelines on implementing research, including an intellectual property policy, on the HRC website.

As provided in the Fifth Schedule of the HRC research contract, new intellectual property resulting from HRC-funded research is owned by the host organisation. Please read the provisions of the contract to understand your obligations with respect to the ownership and application of new intellectual property from HRC-funded research.

9. Publications and publicity

Publications and any other publicity that result from research undertaken during the tenure of a scholarship/fellowship should acknowledge the assistance of the HRC by stating that the research was conducted during tenure of an HRC Māori Health Research Career Development Award and name the specific scholarship/fellowship.

Part B: Guidance on applying for a 2026 Māori Health Research Career Development Award or Research Development Award

This section includes general information on how to apply for a Career Development Award or a Research Development Award and includes:

- **Instructions for using HRC Gateway to submit an application**
- **Formatting requirements for applications**
- **Guidance about the privacy of application content**
- **Contact information if you need assistance with your application.**

When applying, you must follow the instructions in this section.

1. Preparation

HRC Gateway user account

To apply, you will need an HRC Gateway account. You can use your existing account or create a new one if you do not have one via the following URL: <https://gateway.hrc.govt.nz>. If you have issues logging into your HRC Gateway account, contact info@hrc.govt.nz.

Note: All members named on your proposed research team must have an HRC Gateway user account so that their details can be included in the online form. Individual HRC Gateway accounts must be updated each year.

Important documents

Before completing your application, please read:

- The 2026 Māori Health Research Career Development Award Guidelines (this document)
- [Government Policy Statement on Health \(2024-2027\)](#)
- [New Zealand Health Research Strategy \(2017-2027\)](#)
- [New Zealand Health Research Prioritisation Framework](#)
- [HRC Research Ethics Guidelines](#)
- [Guidelines for Researchers on Health Research Involving Māori](#)
- [HRC Māori Health Advancement Guidelines](#) and [supporting resources](#)
- [Guidelines for Pacific Health Research](#)
- [HRC Research Impact Slideshow](#)
- [ARRIVE guidelines for animal research](#) (if applicable)
- HRC CDA Peer Review Manual

Click the document name to access the file.

2. Format

General formatting

Please write your application in a clear, concise manner with sufficient detail. The assessing committees reviewing your application include a broad range of expertise. It is important that they can understand the scope and implications of your application.

Applications must be in English or Te Reo Māori; if in Te Reo Māori, a translation in English must also be provided (any translation will not be included in the page limit).

When applying, please:

- use Arial 10-point type font or larger
- use default margins
- use single line spacing
- keep to the page limits.

Compliance

The HRC will not process your application if you do not use the correct HRC application forms or follow the stated page limits and font sizes/styles. Your application may be withdrawn.

Please avoid these common pitfalls:

1. Only submit your application using HRC Gateway. Do not send applications or supporting documents to the HRC via email or any other means.
2. If your host organisation has a research office (or equivalent), your application must be approved by the research office first. The application will then be released to the HRC. Please allow enough time for this approval process before the HRC's closing deadline. All queries regarding applications should be directed to the host's research office rather than to the HRC directly.
3. Ensure you complete all modules, including the first part of Module 1, which must be completed in HRC Gateway. Incomplete applications after the closing date will be considered withdrawn and deleted from HRC Gateway.
4. Do not include any additional material (e.g. slides, protocols, other funding applications) as 'supporting documents' on HRC Gateway, and avoid using hyperlinks in the application form. The HRC will remove all additional material and hyperlinks from your application.
5. Do not send digital files directly to the HRC. Independent researchers and research providers requiring assistance with using HRC Gateway should contact the HRC in the first instance.

The HRC will not accept any late applications unless you have written permission from the HRC at least one week before the application deadline.

3. Privacy provisions

Statistical and reporting purposes

The information provided in your application will be used to assess your application. In a non-identifiable form, some information will be used for HRC's statistical and reporting purposes. The HRC stores all applications in a secure place, which may include the National Research Information System (NRIS) curated by the Ministry of Business, Innovation and Employment (MBIE) with details provided by funders of the science sector.

Personal information

Personal information contained in your application will be available to HRC staff and those involved in assessing your application.

Media release

The HRC publishes details of research contracts including named investigators, host organisation, research title, lay summaries and funding awarded for public interest purposes and to meet the statutory requirements of the Health Research Council Act 1990.

Official Information Act

Official Information Act requests for information about an application or research contract will be discussed with you and your host organisation before responding to the request. Where appropriate, the request may be transferred to your host organisation.

4. Enquiries

If you have any questions about your HRC funding application, please contact your host organisation's research office.

You can contact the HRC at info@hrc.govt.nz. if:

- your organisation does not have a research office.
- your organisation's research office cannot assist you.
- you have any technical difficulties (i.e. with HRC Gateway).

Part C: Guidelines for completing the 2026 Māori Health CDA Application Form

This section outlines how to complete the 2026 Māori Health Career Development Award Application Form and the 2026 Māori Health Research Development Award Application Form.

1. The application forms

You must use the correct application form.

1.1 Māori Health Career Development Award Application Form

The **2026 Māori Health Career Development Award Application Form** is a Microsoft Word form that contains a coversheet, the second part of Module 1, Module 2, Module 3 and Module 4.

Use this form if you are applying for a:

- **Māori Health Research Master's Scholarship**
- **Māori Health Research PhD Scholarship**
- **Māori Health Clinical Research Training Fellowship**
- **Māori Health Research Postdoctoral Fellowship.**

If you are applying for a **Māori Health Postdoctoral Fellowship** or a **Māori Health Clinical Research Training Fellowship**, you will also need to complete and submit a Microsoft Excel spreadsheet '**2026 Career Development Awards (CDA) Budget**' for Module 4 Sections 4E-4F. You will need to save this as both a .xls file and a .PDF file and upload both versions to HRC Gateway.

1.2 Māori Health Research Development Award Application Form

Each Research Development Award has its own application form. Ensure you are using the 2026 version. Each application form is a Microsoft Word form that contains a coversheet, Module 2, Module 3 and Module 4.

The different application forms are:

- **Māori Health Research Summer Studentship**
- **Māori Rangahau Hauora Training Grant**
- **Māori Health Research Development Grant**
- **Māori Health Research Knowledge Translation Grant.**

1.3 Important instructions

The application form is compatible with Windows PC and Mac computers. You must download and use the correct application form from HRC Gateway as it contains special features. When inserting figures and tables, paste these from a draft document instead of creating them directly in the form.

Remember:

- Enter the 'HRC Reference ID#' and first named investigator's surname on the coversheet.

- Enter information only in the indicated form fields.
- Do not reformat Module and Section headings.
- Use the original HRC forms. Do not copy and paste the form into a new document as this can drastically change fonts and remove other features required for HRC processes.
- Do not delete spreadsheet columns and shaded rows; you can insert more unshaded rows.
- HRC Gateway will remove the coversheet from the final system-generated PDF.

Once you have completed the application form, you will need to upload it to HRC Gateway as a PDF file. HRC Gateway will generate the complete application form with all modules (including Module 1), which you can download and review.

Note: By submitting an application on HRC Gateway, you confirm that your application complies with all requirements, including formatting guidelines and page limits. The HRC will not accept changes after the closing date.

2. Module 1: General information – completed on HRC Gateway

Start this module on HRC Gateway. Create a new application by clicking the 'Apply' button and providing the requested information. Use the 'Save & Continue', 'Update' and 'Save' buttons to move through the application or scroll down the page to see all sections. Use the 'Submit' button at the top of the page to complete this part of the application. HRC Gateway will only accept the submission if all required details have been provided.

2.1 Application details

Research title

The research title should be succinct, written in plain language, and clearly describe the proposed research. The title must not exceed 80 characters, including spaces and punctuation (e.g. 'growth factors' contains 14 characters). Please use sentence case. The HRC reserves the right to amend the title of funded applications.

Lay summary

The lay summary must clearly state: 1) the purpose of the research and why it is needed; 2) how the research will be completed including the research activities; and 3) anticipated health benefits, expected outcomes, and value for money. Your lay summary must be 150 words or less. Please use plain language that can be easily understood by members of the public and avoid using technical terms.

This information will be used to inform the HRC Council in the final approval process if your application is recommended for funding. The HRC reserves the right to amend the lay summary of funded applications.

Host organisation

This is the organisation that will administer the award contract for a successful application. Select the relevant 'host organisation' from the drop-down list. If applicable, select a specific research office and research office contact.

If your host organisation has a research office with more than one staff member, select the contact who will most likely handle your application or will be the principal contact.

If your host organisation has more than one research office, select the office who will be handling your application.

Note: If your host organisation does not appear in the drop-down list, please tick the check box 'My host organisation is not in the list'. The field 'Host organisation details' will appear in the next section and the name of the host organisation should be entered here. New organisations are required to provide due diligence information before being accepted as a research provider.

Research location(s)

This is the department(s) and organisation(s) where most of the research or data analysis will be completed, e.g. 'Department of Community Health, Christchurch School of Medicine' or 'Te Runanga o Ngati Porou'.

Discipline

Choose from the drop-down box. This should be the area that your application is connected with.

Duration

Enter the proposed term in months. You can apply for a shorter full-time term at a pro rata value. Part-time award values will not exceed the full-time maximum.

Commencement date

Your research must commence by 1 March 2026. You must start within 4 months of contract offer, or by a date approved by the HRC.

Support personnel

Examples of support personnel include individuals who will help you with the application process (i.e. upload your application to HRC Gateway). Do not list named investigators or your host organisation's research office staff. All support personnel need to have an HRC Gateway account to view and edit your application.

2.2 First named investigator

Your name and email address will be automatically populated from your profile in HRC Gateway. If your profile is not current, please update your details. The details in the application will automatically refresh after you update your profile.

FTE

Enter an FTE value between 0.03 and 1. Ensure your proposed FTE matches your research activities and aligns with the award's requirements.

Organisation

This is automatically filled in. You can add another organisation if needed.

Department

Provide details.

Other

'Ethnicity', 'Gender', 'Clinician' and 'Practising status' are required for government administration purposes.

Host institutional office contact

Provide details.

2.3 Named investigators

Provide details of any other members of your research team. This includes your supervisor(s). You will need to upload a CV for each named investigator.

2.4 Collaborators

Provide all collaborators' full name, organisation, and country (the location where the organisation is based and where the collaborators undertake their research). For 'collaboration purpose', select one of the following options: research; commercialisation; knowledge transfer. For 'support', indicate the value of any funding for this research provided by the collaborator in New Zealand dollars or list any in-kind support.

2.5 Research costs

The HRC will pay up to the maximum award amount, with variation dependent on salary level and term as applicable. The awarded amount will include applicable course fees and research expenses.

There are no overhead costs associated with any career development award. The HRC expects that overhead costs relating to your research (contributions to property costs or laboratory space, utility charges, equipment charges, laboratory "bench fees", library charges, etc.) are covered by your host organisation.

You must confirm that such resources are in place to ensure you can successfully complete your award. The HRC's contribution to research cost (if any) is intended to facilitate the establishment of your research programme.

2.6 Unacceptable peer reviewers

You can name up to two individuals or groups that you do not want as reviewers for your application. You will need to explain why they are unacceptable.

2.7 Objectives and milestones

Objectives and milestones are assessed, included in a resulting research contract, and are used for contract monitoring in progress and end of contract reports. Objectives and milestones must be measurable and achievable within the term of a contract. There is no limit to the number of objectives and milestones.

Objectives

Briefly describe the intended objectives of your research application. Objectives should relate to the overall goal or aim of the research. The HRC suggests you include at least 3

objectives, with sufficient standalone operational detail and scientific information to assess your performance in subsequent years.

Each of the objectives must be listed separately and added before the milestones can be added.

Milestones

Provide key milestones that you aim to achieve by the end of each year of a resulting contract. Each milestone must relate to at least one of your objectives. For contract monitoring and HRC accountability reporting, if your research requires ethics and/or regulatory approval (human, animal or biological safety) and/or clinical trial registration, these must be identified as separate year 1 milestones, even if you expect to gain these approvals before starting the proposed research award.

Each of the 'milestones' must be listed separately and written in the present tense.

3. Module 1: Applicant Information – completed in the application form

Section 3.1 of these guidelines applies to the 2026 Māori Health Research Career Development Awards. For information on the 2026 Māori Health Research Development Awards, refer to Section 3.2.

Complete this section by following the headings on your application form. Details on how to complete some specific sections are provided below.

3.1 For Māori Health Research Career Development Awards

3.1.1 Section 1B: Personal information

Employment intended or otherwise (if applicable)

If you intend to work during the tenure of the award, please provide details of where you will be employed and the intended number of hours per week. You may not hold positions of employment without the express permission of the Council. Normally, this permission will be given for teaching duties or clinical activities in support of your professional development, approved by your supervisor, but only up to 500 hours per calendar year (this will be pro-rated for part-time fellowships).

Description of field of interest (if applicable)

Focus on your research field of interest.

Overview of previous experience (if applicable)

Outline your previous research/work undertaken that is relevant to your application.

3.1.2 Section 1C: Career plans

Use no more than one page.

Describe your background and potential; specifically, describe how the proposed award will support your development as a health researcher.

3.1.3 Section 1D: Academic support

Provide details on:

- the research environment you will be in
- your academic/research support (e.g. research groups, specialist methodological expertise, access to research equipment, researcher development opportunities, etc.)
- your supervisors and/or mentors (including why they have been selected).

When explaining why your supervisors and/or mentors have been selected, explain how their expertise and skill set relate to your research programme. In addition, include evidence of their track record in mentoring and/or supervision.

Indicate if the research environment is new or a continuation of your current work environment. If the research environment is a continuation of your current work, explain how the research environment will continue to improve/help your research and development as a health researcher. If your local options and opportunities are limited, explain the steps you have taken to address this.

3.1.4 Section 1E: Academic transcript

Upload a JP-certified copy of your academic transcript or professional qualifications to HRC Gateway.

3.1.5 Section 1F: Standard CV - applicant

Upload your CV to HRC Gateway as a separate PDF file. The details in your CV should match your application. Use the CV template available in HRC Gateway, and follow the instructions provided in the template.

Section 3.2 of these guidelines applies to the 2026 Māori Health Research Development Awards. For information on the 2026 Māori Health Career Development Awards, refer to Section 3.1.

3.2 For Māori Health Research Development Awards

3.2.1 Section 1B: Personal information (for research development awards)

Complete this section by following the headings on your application form. Details on how to complete some specific sections are provided below.

Investment stream indication (for development grant applicants only)

The streams are defined as:

- General: Supporting excellent ideas and innovations proposed by researchers, designed to improve health and economic outcomes, equitably, for New Zealanders.
- Rangahau Hauora Māori: Supporting Māori health research that upholds rangatiratanga and utilises and advances Māori knowledge, resources, and people.
- Pacific: Making significant improvements in, or developing knowledge contributing to, Pacific health outcomes.
- Health Delivery: Research with the potential to directly inform changes to health delivery policy, practice, or systems in New Zealand, with a clear line of sight to improved health or other social/economic impacts.

Academic support (for summer studentship applicants only)

Clearly explain why you have chosen your supervisor(s), focusing on their expertise and experience.

Make sure your research supervisor (or at least one member of your supervisory team) is Māori and/or has extensive experience in Kaupapa Māori research.

In addition, your research supervisor (or at least one member of your supervisory team) should have expertise and experience that is highly relevant to your research. For example, if your research involves focus groups or interviews, your supervisor(s) should be highly experienced in qualitative research.

Make sure you include evidence that your supervisor(s) will support you in Module 4 of your application.

4. Module 2: Research information

Notes:

Please follow the page limits stated in your application form. Your application will be withdrawn if it exceeds the stated page limits.

Your application will be assessed by a multidisciplinary committee, so it is in your best interest to write this section in clear, simple language.

Section 4.1 of these guidelines applies to the 2026 Māori Health Research Career Development Awards. For information on the 2026 Māori Health Research Development Awards, refer to Section 4.2.

4.1 Overview of proposed research (for career development awards)

Timelines

Include a timeline in the form of a Gantt chart indicating how the research will be conducted over the duration of the contract. Consider your objectives and milestones that you provided online in Module 1 when creating your timeline.

Health significance

Describe why this research is important and why it needs to be done in New Zealand. Clearly describe how your research has a clear line of sight to improving Māori health outcomes and aligns with HRC priorities (outlined in Section 1.3).

Research design and methods

Include your specific research hypothesis (if relevant) and a detailed design that describes, for example, participant recruitment and characteristics (including number, gender and ethnicity where relevant), study methodology, and proposed methods of data analysis.

Dissemination of results

Describe how the research results will be disseminated to professional colleagues, the general public, health service funders and providers, study participants, iwi and other important groups. As well as peer-reviewed publications, examples include patient leaflets, participant newsletters, clinical guidelines, hui and public meetings and mass media items as appropriate.

Potential for realising health and economic gains for New Zealand

Describe your proposed research's potential for realising health and economic gains for New Zealand. For example, does the proposed research focus on a priority health issue for New Zealand or community with high health needs? Does the proposed research build on and advance existing knowledge, address an important knowledge gap, and demonstrate clear potential to improve health outcomes?

Where does the contribution of this research fit relative to the worldwide perspective? For example, does it support or contribute to research being conducted elsewhere, or is it part of an international collaborative research project? Does it have potential to advance international science, achieve unique competitive advantage, and/or contribute to economic gain?

Where relevant, discuss how the research could impact health policy and/or the provision of health services; what intellectual property may be developed or advanced from this research; the training opportunities and collaborations that may arise; or the potential return on this research investment.

Indication of iwi and/or community support for the research (if relevant)

Describe who you have consulted with, outline the process, and state whether you have gained support for your research. You will need to provide evidence in the form of a supporting letter from a person, group or organisation mandated by the community/organisation, e.g. chair or chief executive, to represent them, show a clear understanding of the research proposed, and how their community/organisation will be affected by, utilise, and/or benefit from, the outcomes of the research. Their involvement in the research as 'host organisation' or 'named investigators' may also suffice as support for your research.

Section 4.2 of these guidelines applies to the 2026 Māori Health Research Development Awards. For information on the 2026 Māori Health Career Development Awards, refer to Section 4.1.

4.2 Overview of proposed research (for research development awards)

For summer studentship applicants only

Clearly describe the specific tasks that you will complete during the summer studentship and how they will contribute to improving Māori health outcomes. You will need to clearly describe your research methods and any relevant protocols. Make sure your research milestones and objectives can be completed during your studentship (usually 10 weeks). Consider this timeline when determining your research activities and the number of participants/interviews/focus groups.

For research development grant applicants only

Provide a summary of the proposed research and the intended contribution it will have to improving health outcomes, as well as specific details on the use of the development grant funds, a justification of costs and how they will contribute to the development of a research proposal. If you wish to seek independent and reputable expert advice, you must provide details of the individual's expertise and how this links with the proposed research.

4.2.1. Overview of proposed knowledge translation activities (for knowledge translation grant applicants only)

Clearly describe how the grant will be used, including the primary target audience(s) and dissemination method(s), and how the dissemination activities will contribute to improving Māori health outcomes. State if you have gained consent from the relevant parties to publish results (e.g. supervisor, participants). If you wish to publish a book, ensure the book has been completed and accepted for publication before submitting your application.

5. Module 3: References

Start this section on a new page.

Provide the citations for key references in the text in Module 2. Details must include **a full list of all author(s)**, title of article, journal, year, volume and page numbers. Place an asterisk (*) beside your publications. If references are multi-authored, you can limit the author list to a more convenient number to fit within the one-page limit.

Reference lists generated by bibliographic software may need to be copied into a blank Word document and then copied into the application form.

6. Module 4: Budget and contract information

6.1 Section 4A: Contract information

For **master's and PhD applicants**, outline costs associated with your study. Ensure that all costs associated with the scholarship are listed (stipend, tikanga allowance etc). Provide an estimate of fees for study. Any costs not entered here cannot be claimed from the HRC if your application is successful.

Host organisation

Your host organisation must commit to financially supporting your research. Please outline the financial support you will be receiving from them.

If you move to another host organisation after the application due date, please notify the HRC of the proposed change as this could affect your application's outcome.

Justification of research staff

Explain and justify the role of personnel who will be associated with your research, including any supervisors or investigators not funded through this research. These may be research assistants, technicians, medical staff, interviewers, support staff or similar, who have specific FTE involvements listed in Section 4F.

Assessing committee members need to understand why the staff requested on the proposal are important and necessary for the proposed research to be successfully completed.

6.2 Section 4B: Previous/current contracts and awards

List previous and current contracts and awards. The table can be replicated below the first one if more are required. You are not required to provide copies of HRC reports as the HRC already has copies. Please note reports may be made available upon request.

6.3 Section 4C: Other support

Include other applications awaiting decision. You must advise the HRC of the outcome of other applications through your research office as soon as possible. The table can be replicated below the first one if more are required.

Provide details of committed or potential co-funding.

Provide details of any financial interest related to the research or sponsorship of the research.

6.4 Section 4D: Letters of collaboration/support

You will need to upload evidence of collaboration/support. These documents should be uploaded as separate PDF files under 'Letters of collaboration/support documents' on HRC Gateway. A list of uploaded documents will be automatically included in the system-generated PDF version of your application form.

You will need to provide:

- a letter of support from your supervisor/mentor stating their supervisory and resource arrangements during the tenure of the proposed award
- a JP-certified copy of your academic transcript or professional qualification (for Māori Health Research Master's Scholarship, Māori Health Research PhD Scholarship, Māori Health Clinical Research Training Fellowship, Māori Health Research Postdoctoral Fellowships and Māori Health Research Summer Studentship)

- Memoranda of Understanding (MOUs) or letter of support for any individual who is not employed by your host organisation and will receive a salary or budget through this career development award (if within your specific award's budget allowances)
- letters of support from any individuals or organisations who are contributing their time but are not receiving payment
- any relevant letters of collaboration to support your application. These should outline how the interested party intends to contribute resources or to be actively involved in the proposed placement and research activity, not simply to state that this work is necessary. Please ensure that any other organisation providing a letter of collaboration recognises their intended commitment to the conduct of the proposed activity and timeline of their involvement.

6.5 Section 4E – 4F

If you are applying for a Māori Health Postdoctoral Fellowship or a Māori Health Clinical Research Training Fellowship, you will also need to complete and submit a Microsoft Excel spreadsheet '2026 Career Development Awards (CDA) Budget' for Module 4 Sections 4E-4F. You will need to save this as both a .xls file and a .PDF file and upload both versions to HRC Gateway.

7. Module 5: Standard CV – Supervisor(s)/investigator(s)

Upload a CV for all named investigators (including those on an MOU).

Use the NZ Standard CV template from HRC Gateway and follow the template's instructions. The HRC will not accept any other form of CV.

The information provided in the CV must match the information provided in your application and your Gateway profile.

Your CV may indicate when career breaks have taken place, as track record will be assessed relative to opportunity.

8. Module 6: Research classification

Classification of research is for HRC evaluation purposes only. The information is not used in allocating funding. Required details must be entered in HRC Gateway.

8.1 Section 6A ANZSRC and keywords

Categorise the proposed research using the ANZSRC codes for the Fields of Research (FOR) and Socioeconomic Objective (SEO). Enter the percentage to the nearest 10% for each category to a total of 100%.

Enter keywords that categorise the research.

8.2 Section 6B Economic benefits

Describe any potential economic benefits you consider may arise from your research. If no direct economic benefits are anticipated, please state this rather than leaving the field blank. The HRC's interpretation of economic benefits is broad and includes:

- Contributing to maintaining a healthy and productive population;
- Contributing to an efficient and cost-effective health system, and
- Value generated from IP and innovation.

8.3 Section 6C Category and health issue

Portfolio mapping category

Enter the requested information on HRC Gateway. Choose the category that best describes the starting point for their research. The following table provides a description of each category.

Mapping category	Description	<input type="checkbox"/>
Biomedical		
Gene	Research into the genetic basis of disease, identification of genes involved. Linkage analysis falls here and not under clinical studies.	
Cell biology	Analysis of molecular-level interactions. This includes protein-protein interactions, determination of the function of genes involved in diseases, and whole cell studies (e.g. immunological studies, transfections, etc.).	
Physiology	This includes all physiology and anatomy. Animal models of disease are included in this category, and studies on host-pathogen interactions.	
Diagnostics	This includes innovations, and the development/refinement of new or existing diagnostic tools.	
Pharmaceuticals /treatments	This includes the development of new pharmaceuticals (drug design and development), as well as new treatments for diseases (e.g. vaccines, other therapies).	
Clinical		
Clinical studies	Research involving human subjects. This excludes research in which samples from human subjects are used for fundamental biomedical research, such as genetic linkage analyses.	
Clinical trials	Randomised clinical trials, usually randomised controlled clinical trials.	
Health services		
Health economics	Research into the cost-effectiveness of treatments/services etc.	
Clinical services	This includes primary and secondary care services. Access to and appropriateness of services are also included, and safety of services and compensation. Macro-level analysis of health system changes falls into this area.	
Public health		
Knowledge resources	This includes all epidemiology, underpinning social science (qualitative and quantitative), development of tools and new methodologies, and development of indicators.	
Risk factors	Research linking life experiences, behaviours, exposures <i>etc.</i> with health outcomes.	
Interventions	Research that includes the design and evaluation of interventions.	

Mapping category	Description	<input type="checkbox"/>
At-risk populations	Includes research on specific population groups. These groups may be based on age, ethnicity, occupation, etc. Includes research using diagnostics in a particular group.	
Community services	Research around community-run services and community groups, e.g. marae-based healthcare services.	

Health issue

Enter the requested information on HRC Gateway. Choose the health issue that best describes your research and, if required, one secondary health issue.

Part D: Explanatory notes for career development awards

Māori Health Master's Scholarship

Description

The master's scholarships are intended to provide 1 year of personal support for students completing the **research component** of a master's degree. Applicants may come from any discipline, as long as the proposed research clearly links to improving health and economic outcomes for Māori. The applicant must be enrolled in the **final year** and undertaking the research component of their master's degree.

Value

- The current value of the master's scholarship is \$20,000 to be used as a stipend to support the student.
- The academic host institution will be responsible for administering the scholarship.
- Activation of the contract for the award shall take place only upon proof of enrolment.
- Tuition fees appropriate to the proposed course of study for the institution at which the student is enrolled may be claimed from HRC, to be activated after enrolment.
- In addition to the scholarship stipend and tuition fees, successful applicants for a Māori Health Research Master's Scholarship may apply for a tikanga allowance of \$1,600.

Eligibility

You are eligible to apply if you are:

- a New Zealand citizen or hold residency in New Zealand at the time of application
- of Māori descent
- enrolled, or intend to enroll, for a master's degree. Successful applicants are usually enrolled full-time; however, the HRC will consider applications from students enrolled part time on their individual merit. The Māori Health Research Master's Scholarship will not be granted for a period longer than the equivalent of one year full-time, or a maximum of two years part-time.

If you have not yet enrolled for your master's degree, but are intending to do so, you can still apply for a Māori Health Research Master's Scholarship. In this case, any award will be conditional on your successful enrolment.

During the year of the Māori Health Research Master's Scholarship, your only activity must be conducting research and preparing a thesis or dissertation. The research will take place over a full academic year. **If your master's course only involves completing papers, you are not eligible for this award.**

Conditions of tenure

- You may only be enrolled at a New Zealand University or other approved New Zealand tertiary institutions. Council also considers the suitability of the proposed department and research supervisor when applications are reviewed.
- An applicant may not hold other positions of employment without the express permission of the Council. Normally, this permission will be given in respect of

teaching duties, up to 500 hours in a calendar year, and with the approval of the research supervisor.

- If you have been offered an additional scholarship or award, the combined stipend may not exceed the co-funder's conditions.
- Tenure of the master's scholarship terminates on the date set out in the contract or on the date of examination (whichever comes first).
- The HRC expects that costs of the research undertaken by Māori Health Master's Scholarship recipients will be borne by the host institution. You will need to confirm that such resources are in place to ensure the successful completion of their award.
- Successful applicants have 4 months from the date of award to take up the scholarship.

Assessment

A Māori Health Career Development Award assessing committee (CDAC) will assess your application. The CDAC will assign a score for each of the assessment criteria outlined below using a 7-point scale.

Applications may be pre-scored by CDAC members before the assessing committee meeting. If so, the HRC will calculate the mean pre-scores and rank candidates. Lower-ranked applications may be triaged and not discussed at the CDAC meeting.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Academic ability of applicant

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is technically and academically capable
- has a proven track record in being able to study
- shows discipline and the ability to achieve success.

B. Māori health significance

Based on the information in the CDA application form, the assessing committee will determine whether the applicant has demonstrated that the proposed research has the potential to:

- advance knowledge relevant to improving Māori health outcomes
- address a Māori health priority
- contribute to Māori workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is actively involved in a leadership capacity in relevant Māori communities
- demonstrates knowledge of the health or research sector
- demonstrates commitment to a future in Māori health research
- has the potential to contribute to the Māori health research sector.

D. Design and methodology

Based on the information in the CDA application form, the assessing committee will determine whether the proposed research design and methodology:

- are feasible, comprehensive and appropriate
- uses culturally appropriate methods for data handling and involvement of Māori participants
- incorporates appropriate research methodologies.

E. Suitable supervision

Based on the information in the CDA application form, the assessing committee will determine whether the supervisor:

- has the necessary academic qualifications, research background and skills to guide the applicant
- has topic-based knowledge and experience using the proposed research design and methodology
- has sufficient time and funding to support, direct and guide the applicant
- will foster a supportive research environment
- has a high level of cultural competency in Māori health issues.

Māori Health PhD Scholarship

Description

PhD scholarships in Māori health research are intended to provide three years of personal support for students undertaking a PhD. Applicants eligible to apply may come from any discipline, as long as the proposed research clearly links to improving health and economic outcomes for Māori.

Note: If you wish to enrol in a PhD and you have a current clinical role, consider your eligibility to apply for a **Māori Health Clinical Research Training Fellowship**. You can only apply for one career development award.

Value

- The current value of the PhD scholarship is \$30,000 (tax free stipend) per annum.
- Your academic host institution will be responsible for administering the scholarship.
- Activation of the contract for the award shall take place only upon proof of enrolment.
- Tuition fees appropriate for the institution where you are enrolled may be claimed from the HRC, to be activated after enrolment.
- A one-off grant of \$10,000 will be allocated to successful applicants. These funds are to contribute towards the working expenses of the doctoral research.
- You can claim an allowance of up to \$550 to produce your thesis.
- The HRC agrees that a portion of this scholarship may be undertaken overseas, in agreement with the host institution and with the appropriate support and training in place. The HRC particularly supports training and research undertaken in Canada and Australia in accordance with the Tripartite Agreement. This must be fully justified, negotiated and detailed within the application.
- In addition to the scholarship stipend, working expenses and thesis production costs, successful applicants for a Māori Health Research PhD Scholarship may apply for a tikanga allowance of \$5,000 over the tenure of the award.

Eligibility

You are eligible to apply if you are:

- a New Zealand citizen or hold residency in NZ at the time of application
- of Māori descent
- enrolled, or intend to enrol, for a research-based degree at the doctoral level, usually a Doctor of Philosophy in a New Zealand university. Successful applicants are usually enrolled full-time; however, the HRC will consider applications from students enrolled in other doctoral research degrees or enrolled part time on their individual merit. The PhD scholarship will not be granted for a period longer than the equivalent of three years full time. Please note, programmes of study where the primary focus is a clinical practice qualification rather than advancing the individual's research skills do not meet the PhD grant requirements.

If you have not yet enrolled for your proposed course of study, but are intending to do so, you can still apply for a Māori Health Research PhD Scholarship. In this case, any award will be conditional on your successful enrolment.

Conditions of tenure

- The PhD applicant may only be enrolled at New Zealand universities or other approved New Zealand tertiary institutions. Council also considers the suitability of the proposed department and research supervisor when applications are reviewed. In exceptional circumstances, it is possible that part of the training could be carried out at an overseas institution.
- Tenure of the Māori Health PhD Scholarship terminates on the date set out in the contract or on the date of the oral examination (whichever comes first).
- If you have been offered an additional scholarship or award, the combined stipend may not exceed the co-funder's conditions.
- An applicant may not hold other positions of employment without the express permission of the Council. Normally, this permission will be given in respect of teaching duties, up to 500 hours in a calendar year, and with the approval of the research supervisor.
- The HRC expects your host organisation to cover any costs needed for you to complete your research. You should therefore confirm that adequate resources are in place to ensure your award can be completed successfully. You may, through their host institution, submit a proposal in the HRC funding round to cover the costs of undertaking your research project. However, such funding is contestable and not guaranteed.
- If you are successful, you have 4 months from the date of award to take up the scholarship.
- Please note that if you submit your PhD before the original contract end date, the HRC will agree to continue support until either the PhD is conferred, or the term of the award has expired (whichever comes first).

Assessment

A Māori Health Career Development Award assessing committee (CDAC) will assess your application. The CDAC will assign a score for each of the assessment criteria outlined below using a 7-point scale.

Applications may be pre-scored by CDAC members before the assessing committee meeting. If so, the HRC will calculate the mean pre-scores and rank candidates. Lower-ranked applications may be triaged and not discussed at the CDAC meeting.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Academic ability of applicant

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is technically and academically capable

- has a proven track record in being able to study
- shows discipline and the ability to achieve success.

B. Māori health significance

Based on the information in the CDA application form, the assessing committee will determine whether the applicant has demonstrated that the proposed research has the potential to:

- advance knowledge relevant to improving Māori health outcomes
- address a Māori health priority
- contribute to Māori workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- will foster a supportive research environment
- has a high level of cultural competency in Māori health issues.

Māori Health Clinical Research Training Fellowship

Description

The Māori Health Clinical Research Training Fellowships are awarded to suitably qualified and practising health professionals, such as medical and dental graduates, psychologists, nurses, allied health and other clinical researchers to enable them to undertake specialised or further clinical research training in fields relating to improving health and economic outcomes for Māori.

A Māori Health Clinical Research Training Fellowship provides broad research training that will combine academic course work and/or a thesis-based degree, with on-the-job research experience and training within a multidisciplinary research group. The award is particularly suited to health professionals seeking additional training for a career in a new clinical research discipline within New Zealand. From time to time, the HRC may offer fellowships in designated priority areas in order to develop a particular clinical research discipline.

Value

- The fellowship provides up to \$80,000 per annum for the fellow's stipend and university fees, and research costs of \$20,000 for a three-year full-time fellowship at a maximum value of \$260,000 (fellow's stipend, university fees, and research costs). Shorter fellowship durations are permitted at a pro rata value. A four-year part-time fellowship is permitted at the maximum value of \$260,000.
- In addition to the fellow's stipend, university fees, and research costs, successful applicants for a Māori Health Clinical Research Training Fellowship may apply for a tikanga allowance of \$5,000.
- The value of the stipend is based on the recipient's qualifications and research experience and will be set by the university.
- Fellowship funds must not be used to contribute to any type of cost that is prohibited in the HRC Rules for permissible use of research funding and operation of contracts, academic supervision costs, overhead charges, fees for examinations or subscriptions to professional colleges.
- Note that each recipient agrees to the stated FTE% contribution and that funding to any recipient from any source will not exceed 100% FTE.

Eligibility

You are eligible to apply if you:

- are a New Zealand citizen or hold residency in New Zealand at the time of application
- are of Māori descent
- are a practising medical graduate, dental graduate, psychologist, nurse, allied health professional or other graduate with research ability, background training and expertise in fields relevant to clinical research
- have a current clinical role
- are enrolled for an appropriate postgraduate qualification which has a research component e.g. medical and dental graduates progressing to MD or PhD, or nurses and other health professionals progressing to MHSc, DPH, MPH or PhD. You will need to identify a suitable research training environment and develop a research training programme in consultation with the proposed supervisor and head of the relevant academic department(s). Please note, programmes of study where the primary focus is a clinical practice qualification rather than advancing the individual's

research skills do not meet the Māori Health Clinical Research Training Fellowship requirements.

If you have not yet enrolled for your proposed course of study, but intending to do so, you can still apply for a Māori Health Clinical Research Training Fellowship. In this case, any award will be conditional on your successful enrolment.

Conditions of tenure

- The Māori Health Clinical Research Training Fellowship may be held for a minimum duration of twelve months and for a maximum duration of three years full-time or four years part-time.
- The Māori Health Clinical Research Training Fellowships are tenable within New Zealand universities, hospitals or other research institutions approved by Council. The department and supervisor must be approved by the HRC. Part or all of the Fellowship may be taken up overseas under exceptional circumstances and if suitable training is not available in New Zealand. Rotation of training under more than one supervisor may be approved.
- Awarded contracts will be administered through the host institution. Fellows are employees of the host institution, and the general conditions of the appointment are those of that institution.
- Fellows may undertake limited clinical and teaching duties relevant to their research to a maximum of 500 hours in a calendar year. They may receive remuneration for such duties. Except in relation to approved limited clinical and teaching duties, Fellows may not receive remuneration for other work without the HRC's permission.
- Other forms of awards may not be held in conjunction with a Māori Health Clinical Research Training Fellowship without the permission of the HRC.
- Fellowships are subject to the terms and conditions of the HRC's research contracts and the HRC Rules: Permissible use of research funding and operation of contracts.
- Tenure of the fellowship terminates on the date stated in the contract or on the date of the oral examination (whichever comes first).

Assessment

A Māori Health Career Development Award assessing committee (CDAC) will assess your application. The CDAC will assign a score for each of the assessment criteria outlined below using a 7-point scale.

Applications may be pre-scored by CDAC members before the assessing committee meeting. If so, the HRC will calculate the mean pre-scores and rank candidates. Lower-ranked applications may be triaged and not discussed at the CDAC meeting.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory

1	Poor
---	------

A. Academic ability of applicant

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is technically and academically capable
- has a proven track record in being able to study
- shows discipline and the ability to achieve success.

B. Māori health significance

Based on the information in the CDA application form, the assessing committee will determine whether the applicant has demonstrated that the proposed research has the potential to:

- advance knowledge relevant to improving Māori health outcomes
- address a Māori health priority
- contribute to Māori workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is actively involved in a leadership capacity in relevant Māori communities
- demonstrates knowledge of the health or research sector
- demonstrates commitment to a future in Māori health research
- has the potential to contribute to the Māori health research sector.

D. Design and methodology

Based on the information in the CDA application form, the assessing committee will determine whether the proposed research design and methodology:

- are feasible, comprehensive and appropriate
- uses culturally appropriate methods for data handling and involvement of Māori participants
- incorporates appropriate research methodologies.

E. Suitable supervision

Based on the information in the CDA application form, the assessing committee will determine whether the supervisor:

- has the necessary academic qualifications, research background and skills to guide the applicant
- has topic-based knowledge and experience using the proposed research design and methodology
- has sufficient time and funding to support, direct and guide the applicant
- will foster a supportive research environment
- has a high level of cultural competency in Māori health issues.

Māori Health Postdoctoral Fellowships

Description of Māori Health Postdoctoral Fellowship

All Māori Health Postdoctoral Fellowships are intended for the support of outstanding graduates who have recently completed a degree at doctoral level and who propose to conduct research relating to improving health and economic outcomes for Māori. Their purpose is to provide support for up to four years for researchers to gain further experience in their chosen fields and for them to become established as an independent health researcher. Where appropriate, the fellowship could include a period of up to two years of training that is undertaken overseas.

Postdoctoral fellowships are available to applicants from all disciplines, as long as the proposed research clearly links to improving health and economic outcomes for Māori. There are four named postdoctoral fellowship category types, each focusing on a different area of Māori health research. If you are applying for a named postdoctoral fellowship, make sure your research area aligns with the categories outlined below. If your research is in an area outside of the categories listed below, you can apply for a General Māori Health Research Postdoctoral Fellowship.

Erihapeti Rehu-Murchie Fellowship

This postdoctoral fellowship honours the work of Dr Erihapeti Rehu-Murchie, a former HRC kaumatua who originally trained as a teacher and went on to contribute to a wide range of arts, health, education organisations and statutory bodies. This fellowship supports emerging leaders in Māori health research whose research focuses on topics in which Dr Rehu-Murchie was active: Māori women's and children's health; whare tapa whā (a four-point holistic health model involving tinana, hauora hinengaro, Hauora whanau and hauora wairua); health promotion or health policy including Māori and indigenous human rights.

Eru Pōmare Fellowship

This fellowship was created in recognition of Professor Eru Pōmare's outstanding contributions to gastroenterology, clinical research, medical training, and Māori health, as well as his commitment to high academic achievement by Māori. Eru Pōmare Fellowships support emerging leaders in Māori health development who propose to undertake research in an area relevant to Māori health. Applications from medically qualified individuals are especially welcome.

Hōhua Tutengaehe Fellowship

This fellowship was created in recognition of Hōhua Tutengaehe's contributions to te iwi Māori and the development of Māori health research that is consistent with tikanga Māori. Hōhua Tutengaehe worked tirelessly to improve the cultural, social, health and economic position of Māori throughout Aotearoa. He was a renowned orator, genealogist, poet, historian and tohunga; he also worked as an independent social worker amongst te iwi Māori. In addition to his many other commitments, he served on numerous local and government organisations. As kaumatua to the HRC and a founding member of Te Kōmiti Māori, Hōhua was a strong advocate for research that was consistent with tikanga Māori and resulted in benefits to te iwi Māori. Hōhua Tutengaehe Postdoctoral Fellowships support emerging leaders in Māori health development who propose to undertake research on health-related topics that were of special interest to Hōhua Tutengaehe such as: Māori community health development; Mātauranga Māori; Te reo me ona tikanga; Te Ao Wairua; urban Māori; justice; or Rangatahi.

Irihapeti Ramsden Fellowship

This postdoctoral fellowship honours the work of Dr Irihapeti Ramsden and her contribution to the field of nursing and cultural safety. It provides a salary for an emerging leader in Māori health research with a PhD or equivalent to undertake clinical or medical research with a focus on Māori nursing.

Value

For all postdoctoral fellowships offered, the current value of the fellowship is based on the recipient's qualifications and research experience in regard to salary levels set by the university. This usually equates with the academic salary scale of LG1-LG4, (or LM1-LM4 for applicants who hold an MBChB, BDS or equivalent degree). Salary scales vary from institution to institution. Please contact your host institution for the appropriate salary scale.

- The HRC will provide a grant of up to \$100,000 for research expenses associated with the research. The applicant must submit a detailed budget on the appropriate excel budget form.
- The HRC will provide a conference allowance of up to \$3,000 to enable the Fellow to travel to relevant scientific meetings. Please note that in this instance, HRC will not provide any extra funding. The conference allowance should be claimed from the host institution.
- The HRC will pay ACC levies proportionate to the fellowship.
- If a portion of this fellowship is partly undertaken overseas, an adjustment for cost of living may be made. This adjustment will be indexed to a value of US\$25,000 per annum. Please note the exact sum will be determined by, and vary in accordance with, the exchange rate. The HRC particularly supports training and research undertaken in Canada and Australia in accordance with the Tripartite Agreement.
- Successful applicants for a Māori Health Postdoctoral Fellowship (including the Erihapeti Rehu-Murchie, Eru Pōmare, Hōhua Tutengaehe and Irihapeti Ramsden Fellowships) may apply for a tikanga allowance of \$5,000 over the tenure of the Fellowship.
- Provided fellows meet their host institution's rules for entry, they may apply to join the superannuation scheme administered by their host. Any fellow who prior to commencing their HRC award is a member of a superannuation scheme administered by their host institution will be eligible to continue in that scheme. Employer contributions will be paid by the HRC.

Eligibility

You are eligible to apply if you:

- are a New Zealand citizen or hold residency in New Zealand at the time of application
- are of Māori descent
- hold a degree of doctor of philosophy or an equivalent degree. Although applications will be received from individuals who have not yet received results of their thesis examination, the award and commencement of the fellowship will be conditional on awarding of the degree. The thesis must be submitted for examination at the time of application. Written confirmation will be requested.
- have a proven track record of research in the area of Māori health development.

Applicants should not normally have had more than five years' postdoctoral experience.

Conditions of tenure

- Usually, successful applicants will be involved in full time research. The HRC will however, consider applicants wishing to undertake part-time research on their individual merit. In the case of part-time fellowships, applicants must be involved in research for a minimum of 0.5FTE and the maximum duration of the postdoctoral fellowship will remain at four years. Fellowships will be reviewed annually and will be renewed subject to provision of satisfactory annual progress reports.
- Māori Health Postdoctoral Fellowships are tenable within New Zealand universities, hospitals or other research institutions approved by Council. The institution, department and supervisor must be approved by the HRC and should not usually be the department or institution in which the research leading to the award of a doctorate was performed.
- Postdoctoral fellowship awards will be administered through the host institution. Fellows are employees of the host institution, and the general conditions of the appointment are those of that institution.
- Tenure of the Māori Health Postdoctoral Fellowship terminates on the date set out in the contract.
- The HRC expects that costs of the research undertaken by postdoctoral fellowship recipients will be borne by the host institution. Applicants should confirm that such resources are in place to ensure the successful completion of their award. The prospective postdoctoral fellow may, through their host institution, submit a proposal in the HRC funding round to cover the costs of undertaking their research project. Applicants should understand however that such funding is contestable and not guaranteed.
- Fellows may undertake limited clinical and teaching duties relevant to their research to a maximum of 500 hours in a calendar year. They may accept remuneration for such duties. Except in relation to approved limited clinical and teaching duties, postdoctoral fellows may not receive remuneration for other work without the permission of the Council.
- Other forms of awards may not be held in conjunction with a postdoctoral fellowship without the permission of the HRC.
- Fellows may not enter examinations for higher qualifications during tenure of their fellowship without permission of the HRC.
- Successful applicants have 4 months from the date of the award to take up the fellowship. This will be enforced unless a written request is submitted from the host institution and confirmed by the HRC. Only exceptional circumstances will be accepted.

Assessment

A Māori Health Career Development Award assessing committee (CDAC) will assess your application. The CDAC will assign a score for each of the assessment criteria outlined below using a 7-point scale.

Applications may be pre-scored by CDAC members before the assessing committee meeting. If so, the HRC will calculate the mean pre-scores and rank candidates. Lower-ranked applications may be triaged and not discussed at the CDAC meeting.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good

3	Adequate
2	Unsatisfactory
1	Poor

A. Academic ability of applicant

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- has outstanding qualifications and some post-doctoral research experience
- is likely to achieve success.

B. Māori health significance

Based on the information in the CDA application form, the assessing committee will determine whether the proposed research:

- has the potential to significantly advance knowledge relevant to improving Māori health outcomes
- has the potential to comprehensively address a Māori health priority
- should justifiably be completed in New Zealand
- has the potential to contribute substantively to Māori health research workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the CDA application form, the assessing committee will determine whether the applicant:

- is actively involved in a leadership capacity in relevant Māori communities
- demonstrates a comprehensive knowledge of the health or research sector
- demonstrates a high level of commitment to a future in Māori health research
- has the potential to make a significant contribution to the Māori health research sector.

D. Design and methodology

Based on the information in the CDA application form, the assessing committee will determine whether the proposed research design and methodology:

- are excellent, comprehensive and appropriate
- uses culturally appropriate methods for data handling and involvement of Māori participants
- incorporates appropriate research methodologies.

E. Career development and support

Based on the information in the CDA application form, the assessing committee will determine whether:

- the applicant is well supported in terms of mentorship and personal development
- the mentor(s) can provide the applicant with comprehensive advice and support
- the mentor(s) have a high level of cultural competency in Māori health issues.

Part E: Explanatory notes for Research Development Awards

Māori Health Research Summer Studentship Award

Description

Summer studentships are primarily aimed at the undergraduate level. They are available to introduce research to students who have had no or very limited research experience and have the potential to develop in a career in Māori health research and contribute to improving Māori health outcomes.

Value

The value of the award is \$7,500. Half will be paid to you at the start of the studentship, and the remaining half will be paid once we receive a satisfactory research report and have approved the completion of your studentship.

Eligibility

You are eligible to apply if you:

- are a New Zealand citizen or hold New Zealand residency at the time of application
- are of Māori descent
- are enrolled in an undergraduate health-related course
- have no or very limited research experience
- have the potential to develop in a career in Māori health research
- want to be involved in a Māori health research project over the summer vacation (usually 10 weeks).

Important points to consider

Completing the application

- The summer student is expected to complete the application form.
- You will need to include a witnessed/signed copy of your academic record (not the original) with your application.
- Your application must be approved and signed by your host organisation or university's research/scholarships office.

Your supervisor(s)

- Your chosen supervisor(s) should be a suitable role model, with the necessary time, interest and enthusiasm to supervise you. A supervisor can only supervise up to two HRC summer studentships per year.
- Your research supervisor (or at least one member of your supervisory team) should be Māori and/or have extensive experience in kaupapa Māori research.
- In addition, your research supervisor (or at least one member of your supervisory team) should have expertise and experience that is highly relevant to your research. For example: If your research involves focus groups or interviews, your supervisor should have experience in qualitative research. They should also have a record of publications in qualitative research.
- Your application must be approved and signed by your supervisor to confirm that they support your application.

Your research project

- Your project should directly relate to the health of iwi Māori; you can decide on the specific topic with your supervisor.
- Your project should be a distinct piece of research that can be completed within the period of the studentship (usually ten weeks). Consider this short timeline when deciding on your research activities and the number of participants/interviews/focus groups.
- Your studentship should involve some training in research methodology and report writing. We encourage you to present the results of your research at a seminar and/or by publication. It is both your responsibility and your supervisor's responsibility to ensure that the project is completed on time.
- In your application, you must clearly state the specific tasks you will complete during the studentship. You will also need to clearly describe your research methods and any relevant protocols.
- If there is another student who is applying with the same supervisor or wants to complete a similar project, your specific tasks and learning outcomes must be as different as possible. Duplicate copies of the same application will not be accepted.

Ethics approval

- If ethics approval is required for your summer studentship, your supervisor must ensure that this is obtained before you submit your application. Otherwise, choose a project that does not require ethics approval.

Assessment

A Māori Health Career Development Award assessing panel will assess your application. Each panel member will independently assign a score for each of the assessment criteria outlined below using a 7-point scale.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Ability to complete and academic background

Based on the information in the research development award application form, the assessing committee will determine whether the applicant:

- is technically and academically capable
- has a proven track record in being able to study
- shows discipline and the ability to complete
- will likely achieve success.

B. Māori health significance

Based on the information in the research development award application form, the assessing committee will determine whether the applicant has demonstrated that the proposed research has the potential to:

- advance knowledge relevant to improving Māori health outcomes
- address a Māori health priority
- contribute to Māori workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the research development award application form, the assessing committee will determine whether the applicant:

- is actively involved in a leadership capacity in relevant Māori communities
- demonstrates a knowledge of the health or research sector
- demonstrates a commitment to a future in Māori health research
- has the potential to make a contribution to the Māori health research sector.

D. Suitable supervision

Based on the information in the research development award application form, the assessing committee will determine whether the supervisor:

- has the necessary academic qualifications, research background and skills to guide the applicant
- has topic-based knowledge and experience using the proposed research design and methodology
- has sufficient time and funding to support, direct and guide the applicant
- will foster a supportive research environment
- has a high level of cultural competency in Māori health issues.

Reporting

If you are successful, you will need to submit a research report at the end of your studentship. We will provide details on what is expected at the start of your studentship.

All reports will be reviewed, and the HRC reserves the right to suspend or terminate the award if your progress is unsatisfactory.

Publications and publicity

Publications and any other publicity that result from research undertaken during the tenure of the studentship should acknowledge the assistance of the HRC by stating that "The research was conducted during tenure of a Māori Health Research Summer Studentship from the Health Research Council of New Zealand".

Māori Rangahau Hauora Training Award

Description

Rangahau hauora awards provide personal support to individuals wanting to complete a period of research training relevant to Māori health. The award is suitable for individuals who do not have an academic background but wish to learn research skills for an intended piece of health research that will be of benefit to their area, community, or organisation.

Value

The total value of the award is determined based on the applicant's circumstances and the duration of training. A maximum of \$12,000 is available over six months. Any funds awarded should be treated as taxable income; this will be your responsibility as the award holder.

The award can be used to pay for travel, transport, koha, communication costs, accommodation, living expenses and course fees (if required). The award cannot be used to complete studies that are already in progress (e.g. a master's qualification or equivalent). If you are interested in a full-time career in health research, please consider the HRC Career Development Awards (e.g. Māori Health Research Master's and PhD Scholarships).

Eligibility

You are eligible to apply if you:

- are a New Zealand citizen or hold New Zealand residency at the time of applying
- are of Māori descent
- have a background and involvement in Māori community activities
- will be working or training in an area related to health
- want to complete research training and learn practical research skills to use in a research project that is relevant to Māori health.

Important points to consider

Your supervisor(s)

- You will need to organise a suitable supervisor and decide on a research project before applying for this scholarship.
- You are responsible for determining the exact nature of the research training in consultation with experienced researchers or supervisors. You should determine what types of research skills are required in your intended project, suitable places to learn these skills, and who could provide supervision.
- Once you have identified a supervisor, you and your supervisor can determine which of the required skills could be developed during the limited duration of the award and with the available teaching and supervision resources.

Your research training

- The main component of your research training could include on-the-job training with experienced researchers (similar to an apprenticeship). You can be introduced to research procedures by working on an existing project with your chosen supervisor. In this way, you can gain practical experience in research techniques, which are directly applicable to your intended research. Relevant courses at tertiary institutions could form part of your research training, but academic study is considered complementary to the practical experience gained by working with researchers.

- Make sure your research milestones and objectives can be completed within the award's duration.
- Your host organisation must provide any equipment required for your training.
- Full-time research training is considered as the most productive use of this award, but it is recognised that work and/or whānau obligations could make full-time training impractical for many people. Therefore, some consideration will be given to flexibility of training during the award.
- If you are successful, you will have 4 months from the date of the award to take up the scholarship.

Assessment

A Māori Health Career Development Award assessing panel will assess your application. Each panel member will independently assign a score for each of the assessment criteria outlined below using a 7-point scale.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Research potential of the applicant

Based on the information in the research development award application form, the assessing committee will determine whether the applicant:

- has outstanding research potential
- is likely to succeed in the proposed course of study
- is likely to be successful in applying their developed skills to the proposed research project.

B. Māori health significance

Based on the information in the research development award application form, the assessing committee will determine whether the applicant has demonstrated that the proposed research has the potential to:

- advance knowledge relevant to improving Māori health outcomes
- address a Māori health priority
- contribute to Māori workforce development or intellectual capital.

C. Māori community links, health background and potential

Based on the information in the research development award application form, the assessing committee will determine whether the applicant:

- is actively involved in a leadership capacity in relevant Māori communities
- demonstrates a knowledge of the health or research sector
- demonstrates a commitment to a future in Māori health research

- has the potential to make a significant contribution to the Māori health research sector.

D. Proposed course of study

Based on the information in the research development award application form, the assessing committee will determine whether the proposed course of study is:

- likely to be highly beneficial to the applicant in terms of their intended research project
- likely to be of benefit to the applicants' future health research contributions.

E. Suitable supervision

Based on the information in the research development award application form, the assessing committee will determine whether the supervisor:

- has the necessary academic qualifications, research background and skills to guide the applicant
- has topic-based knowledge and experience using the proposed research design and methodology
- has sufficient time and funding to support, direct and guide the applicant
- has a high level of cultural competency in Māori health issues.

Reporting

If you are successful, you will need to submit a supplementary report when you complete your award. The HRC will provide details on what is expected at the start of your award.

All reports will be reviewed and the HRC reserves the right to suspend or terminate the award if your progress is unsatisfactory.

Publications and publicity

Publications and any other publicity that result from research undertaken during the tenure of the award should acknowledge the assistance of the HRC by stating that "The research was conducted during tenure of a Māori Rangahau Hauora Training Award from the Health Research Council of New Zealand".

Māori Health Research Development Grant

Description

Development grants support the planning and scoping of a new research project that will be submitted in the HRC's Annual Contestable Funding Round through one of four investment streams: Rangahau Hauora Māori, Pacific health, New Zealand health delivery, or General projects. The grant can be used to obtain independent and reputable expert advice during the development of a proposal, and/or mitigate costs of consulting with particular communities and relevant organisations and/or accessing resources critical to proposal development.

Value

Development grants are not intended to fund the conduct of an actual research project, as the level of funding will not enable the research study to be of adequate size to reach a meaningful result, nor are they available to top up existing research projects. Up to \$10,000 is available.

The development grant funds are administered directly to the applicant's bank account. If the applicant would like the funds to be administered to the host institutions bank account, the applicant must ask their host institution to raise an invoice to be sent to the HRC.

Eligibility

You are eligible to apply if you:

- are a New Zealand citizen or hold New Zealand residency at the time of applying
- have a true intention of applying to the Annual Contestable Funding Round.
- have not previously held any individual competitive research grant as a first named investigator for research expenses of greater than \$105,000 from any source at the time of assessment (including institutional or internal funding). Scholarship and fellowship stipends are not included, provided the expenses component of such awards does not exceed \$105,000.

Important points to consider

- You will need to provide a summary of your proposed research, as well as specific details on how the development grant funds will be used.
- You will need to justify your costs and how they will help develop a research proposal.
- If you wish to seek independent and reputable expert advice, you must provide details of the individual's expertise and how it links with the proposed research.
- Your application must clearly show your intention to submit a project application to the annually run funding round. This includes your description of the research, budget and timelines. If you do not indicate your intention, your application may be affected.

Tenure

Successful applicants will have 4 months from the date of award to take up the Development Grant. An EOI application to the Funding Round is expected to be submitted in the following year from when the Grant was awarded.

Assessment

A Māori Health Career Development Award assessing panel will assess your application. Each panel member will independently assign a score for each of the assessment criteria outlined below using a 7-point scale.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Rationale

The purpose of the grant is important worthwhile and justifiable because:

- the research topic contributes to improving Māori health outcomes
- the use of the funds is clear, well documented and supported
- the topic, purpose, fund and/or resources fit together well
- it is important and will make a difference
- it represents value for money.

B. Fit with investment stream

The development grant application is feasible because it:

- identifies a fit with one of the four investment streams
- clearly shows contribution to the nominated investment signal goals
- contributes to development of the Māori health research workforce
- explicitly indicates an intention to submit a proposal in the next annual funding round

C. Expertise and track record of the research team

The team has the ability to achieve the proposed outcomes and impacts because they have demonstrated:

- appropriate qualifications and experience relevant to the application
- the potential to pull together the right mix of expertise and knowledge
- potential capability to perform research
- key networks/collaborations that will be needed.

Reporting

If you are successful, you must submit a supplementary report at the end of your award. The HRC will provide details on what is expected at the start of your award.

All reports will be reviewed and the HRC reserves the right to suspend or terminate the award if your progress is unsatisfactory.

Publications and publicity

Publications and any other publicity that result from research undertaken during the tenure of the award should acknowledge the assistance of the HRC by stating that "The research was conducted during tenure of a Māori Health Research Development Grant from the Health Research Council of New Zealand".

Māori Health Research Knowledge Translation Grant

Description of knowledge translation grants

Knowledge translation grants are available for dissemination of research which key stakeholders (e.g. iwi, community, health providers, Ministry of Health, Te Puni Kokiri) have identified as important for future use, including policy and health service development, and will contribute to improving Māori health outcomes. The HRC recognises the importance of dissemination and the various forms it can take on, dependent on the target audience. Dissemination is the purpose of this grant and can include taking specified information from the research and making a publication that is better suited to the needs of an intended audience. It can include a hui publication of a report or book and can focus on specific elements aimed at particular iwi/age or gender groups and/or at a particular health area (e.g. oral health, nutrition, cultural safety guidelines for a specific health provider centre, customary healing practices of a specified hapū or iwi). The grant can also be used to develop a health-related website/page; however, its primary purpose will need to be dissemination of health or research related information/publications that have emerged from health research undertaken.

Knowledge translation grants are not available for:

- publication of a thesis
- presenting results of a research project or travel to an intended conference as these should be funded as part of the original research proposal
- tikanga expenses as a tikanga allowance is paid as part of all HRC Māori awards
- topping up any shortfall in an existing HRC research contract. This is the responsibility of the host institution
- to undertake research.

Value

Funds of up to \$5,000 are available.

The knowledge translation grant funds are administered directly to the applicant's bank account. If the applicant would like the funds to be administered to the host institution's bank account, the applicant must ask their host institution to raise an invoice to be sent to the HRC.

Eligibility

You are eligible to apply if you are:

- a New Zealand citizen or hold residency in New Zealand at the time of applying
- of Māori descent.

Conditions of tenure

Successful applicants will have 4 months from the date of award to take up the grant and a further 6 months to submit copies of the publication to the HRC.

Assessment

A Māori Health Career Development Award assessing panel will assess your application. Each panel member will independently assign a score for each of the assessment criteria outlined below using a 7-point scale.

Score	Criteria descriptor
7	Exceptional
6	Excellent
5	Very good
4	Good
3	Adequate
2	Unsatisfactory
1	Poor

A. Rationale

The purpose of the grant is justifiable because:

- it contributes to improving Māori health outcomes
- use of the funds is clear, well documented and supported
- represents value for money
- the intended audience is clearly identified in the application.

B. Dissemination technique fits with the criteria

The information disseminated:

- has been identified as important to the intended audience or other key stakeholder
- will clearly benefit the intended audience
- is in a different format than that of the original research findings or outcomes (if appropriate)
- is health and/or health research related.

C. Track record of the applicant

The candidate:

- is currently actively involved in relevant Māori communities
- demonstrates a comprehensive knowledge of the health or research sector
- has a commitment to improving Māori health outcomes.

Submission of final copies

All award recipients are required to submit both a hard copy of their publication or website/page information and an electronic (PDF) copy to the HRC within six months of receiving the award. It is an expectation that publications will have an International Standard Book Number (ISBN) which can be obtained at no cost through the following link <http://www.natlib.govt.nz/services/get-advice/publishing/isbn>. An ISBN allows for greater dissemination throughout New Zealand and is also useful for the applicants as part of their publication list.

All successful applicants will need to fill in the Final Report Submission Cover Sheet to be included with the copies of the publications and or printouts of website/page information.

Publications and publicity

Publications and any other publicity that result from research undertaken during the tenure of the award should acknowledge the assistance of the HRC by stating that "The research was conducted during tenure of a Māori Health Research Knowledge Translation Grant from the Health Research Council of New Zealand".
